PROFESSIONAL SUMMARY

Aspiring **DevOps Engineer** with hands-on knowledge of **Linux, AWS, Docker, Kubernetes, Jenkins and Terraform**. Built academic projects covering **cloud deployment, containerization, and CI/CD automation**. Passionate about infrastructure automation, scalable cloud systems, and continuous learning in the DevOps ecosystem.

TECHNICAL SKILLS

Cloud & DevOps Tools: AWS (IAM, EC2, S3, VPC, EBS, Route53, CloudWatch) | Docker & Docker Compose | Jenkins | GitHub Actions | Kubernetes | Terraform | Ansible

Scripting & OS: Bash | Python (Basic) | Linux (Ubuntu) | Windows

Monitoring & Web Servers: Prometheus | Grafana | Nginx | Apache

Networking & Version Control: TCP/IP | DNS | HTTP/HTTPS | SSH | Git & GitHub

Competencies: Problem Solving | Communication | Teamwork | Quick Learner | Time Management

PROJECTS

Static Website Deployment on AWS EC2

- Provisioned and configured an AWS EC2 instance running Ubuntu, connected via SSH for secure remote administration.
- Installed and configured Nginx as a web server to host a static website, ensuring reliable public availability.

CI/CD Pipeline using Jenkins

- Integrated GitHub with Jenkins to automate the build and deployment pipeline, reducing manual release effort.
- Configured Jenkins jobs to trigger automated builds on code commits, improving delivery speed and consistency.

Infrastructure as Code using Terraform

- Provisioned AWS resources using Terraform, applying Infrastructure as Code principles for repeatable environments.
- Wrote declarative configuration files to automate resource creation and reduce manual setup errors.

EDUCATION

B.Tech, G H Rasoni International Skill Tech University, Pune

2025 - 2028

Diploma, VDF School of Engineering & Polytechnic, Latur

2022 - 2025

SOFT SKILLS

Problem Solving | Communication | Teamwork | Quick Learner | Time Management
